

A new twist on safer water

Safer water on tap – from every tap in the home. The flow of ingenuity at GE brings an unlimited flow of purified water to homeowners. The Homespring™ Central Water Filtration System is a point-of-entry system that delivers purified water with unbeatable convenience and unparalleled quality. Its award-winning Ultrafiltration (UF) membrane technology improves the taste, clarity and quality of water – and it's certified as a microbiological purifier.* The Homespring is easily plumbed, eliminates on-site chemical storage, and will continue to function even when power is interrupted. An automatic self-cleaning cycle and simple annual maintenance assure unsurpassed reliability.

For the latest twist on new technology, turn to GE. Call 866-418-7412, or visit www.homespring.com.

*Independent testing and certification data available upon request.
